⚠ Remaining Actions — Require External Account Setup (cannot be fixed in code)

GA4 Measurement ID: Create GA4 property at analytics.google.com → replace G-XXXXXXXXXX in all 10 HTML files → conversion tracking will auto-activate

Google Search Console (GSC): Verify svie5.com domain at search.google.com/search-console → submit sitemap.xml → monitor indexing and Core Web Vitals

Google Business Profile (GBP): Claim / verify listing at business.google.com → links AggregateRating schema to Maps star ratings → add photos and respond to reviews

Image WebP conversion: Convert remaining gallery JPEGs to WebP format (~30% file size reduction) using tools like Squoosh or cwebp CLI
